RECENT WORK EXPERIENCE

Software Engineer, Gartner Inc. *(Feb 2019 – present)*

Build, maintain and support over 30 individual applications, tools, and services, including several customer-facing websites (e.g. Capterra.com), an internal CRM and reporting tool, and bidding & click engines (which process tens of thousands of clicks on our customer-facing sites daily, resulting in tens of millions of dollars of revenue annually).

Tech Stack: Ruby on Rails, JavaScript, ReactJS, HTML5/CSS3, Oracle, MySQL, Redis, Amazon RDS, and Elasticsearch.

Web Development Consultant, The BREIS Agency *(2016 – 2019)*

Provided business consulting and WordPress development utilizing HTML and CSS. Developed web apps for 8+ clients, consistently producing gains and achieving organizational goals.

Tech Stack: WordPress CMS, HTML5/CSS3

Select Results

- Implemented online contracts and follow-up functionality for prominent makeup artistry, reducing lost clientele by 50% and increasing follow up by 60%
- Increased repeat clientele for wellness-sector client by 40% through comprehensive booking process. Increased client conversion by 30% by refactoring service/pricing information, and improving branding

Data Analyst, D.A.R.E Global Innovations Inc. *(2014 – 2015)*

Program Analyst, Social Solutions International Inc. *(2014)*

Research Associate, Manila Consulting Group *(2010 – 2013)*

Conducted systematic, reproducible searches of life science and biomedical databases (such as PubMed) as a part of constructing reports on key health issues for clients such as the Department of Transportation and the Centers for Disease Control.
